Sitetracker SME & Salesforce Administrator | Flow, Apex, LWC | Telecom & Utility Infrastructure | PMP, CSM, MBA

Sitetracker Subject Matter Expert and Sitetracker Administrator for Southern California Edison's Digital Grid Services (contract via World Wide Technology; 300 users across 6 departments), hands-on with Flow Builder, Apex, Lightning Web Components (LWC), validation rules, permission sets, Data Loader, data migration, and sandbox/UAT release management. Brings 30+ years of telecom and wireless infrastructure leadership—site acquisition, leasing, permitting, A&E, and 50–400 concurrent projects for Verizon, AT&T, and Crown Castle—so platform configuration reflects how field work actually runs. PMP, CSM, MBA. Seeking remote or hybrid Sitetracker and Salesforce administrator, developer, and SME contracts.

CORE SKILLS

Salesforce/Sitetracker Platform: Sitetracker Configuration/Administration, Salesforce Lightning, Flow Builder, Apex, Lightning Web Components (LWC), Validation Rules, Permission Sets, Reports & Dashboards, Data Loader, Data Migration, Salesforce Inspector Reloaded, Sandbox & UAT, Release Management, User Training

Project & Leadership: PMP, CSM, Cross-Functional Team Management, Change Management, Vendor Negotiation, Budget Oversight (up to $4M)

Microsoft & Other Tools: Microsoft Power Platform (PowerApps, Power Automate, Power BI, Dataverse), Office 365, Microsoft Teams, Visual Studio Code (basic), VBA/Python (basic), Windows, Linux

Industry Expertise: Telecom Infrastructure (Wireless Networks, Site Hardening, Fiber Entitlements), Utility Grid Modernization, RF Engineering, Real Estate Leasing/Permitting, A&E Oversight

PROFESSIONAL EXPERIENCE

9/2024 to present

Sitetracker SME & Administrator
Southern California Edison (Contract via World Wide Technology)– Rosemead, CA
Remote & Onsite

- Delivered progressive Sitetracker rollouts across 6 SCE departments with zero downtime, managing sandbox testing, UAT, and release management through production deployment.
- Serve as Sitetracker Administrator from startup through post-migration and ongoing operations, configuring Lightning page layouts, validation rules, permission sets, and Flow Builder automations for 300 users across 100+ objects.
- Developed and deployed custom enhancements using Apex and Lightning Web Components (LWC), and built 4 integrations between Sitetracker and SCE data sources, including Salesforce and legacy utility systems.
- Partnered with WWT teams to lead end-to-end Sitetracker implementation for SCE's Digital Grid Services: gathered departmental requirements, redesigned processes, and completed migrations for several key departments now fully operational.
- Migrated and validated 20,000 legacy project records using Data Loader and Salesforce Inspector Reloaded.
- Built Sitetracker reports and dashboards for cross-department data visibility; delivered user training and advised SCE on best practices and scalable integrations through a hybrid remote/onsite support model.

10/2020 to 10/2023

Site Acquisition Department Manager
Network Connex – Glendale, CA remotely from Columbus, OH

- Directed real estate entitlements for diverse telecom projects, including site hardening, new builds, lease renewals, fiber entitlements, modifications, and backhaul infrastructure.
- Developed and implemented innovative project management strategies, significantly streamlining operations and enhancing efficiency.

- Managed teams of agents in lease negotiations, ensuring legal compliance and engineering standards across multiple initiatives.
- Utilized Microsoft Power Platform, PowerApps, Salesforce, and Dataverse to build and deploy custom project management systems tailored to telecom needs.
- Oversaw lease management from template preparation to term negotiation and legal approvals.
- Reviewed and redlined architectural/engineering drawings to maintain project integrity and compliance.
- Handled financial controls, including purchase order requests, aligning with budgets and timelines.

08/2005 to 07/2019 **Director – Professional Services**
Centerline Solutions – Honolulu, HI & Golden, CO (Remote from Columbus, OH)
(Company ceased operations in 2019)

- Executed end-to-end delivery for 50–400 concurrent wireless infrastructure projects, managing budgets up to $1M each for clients like Verizon, AT&T, and Crown Castle.
- Coordinated cross-functional teams in RF, A&E, site acquisition, construction, and field operations, emphasizing safety, precision, and rapid deployment.
- Advanced to Director role, expanding into municipal/state/federal business development while optimizing internal processes for efficiency gains.
- Created and rolled out in-house training and change management programs, boosting team capabilities and project standards.
- Cultivated direct client relationships as primary contact, earning top-producer recognition company-wide.

04/1994 to 08/2005 **Entrepreneurial Experience - Founder & President**
Island Page Inc. – Honolulu, HI

- Built and scaled a statewide wireless paging network from zero to 30,000 subscribers, 4 retail locations, and 30 employees—culminating in a profitable sale at 7x EBITDA.
- Engineered RF infrastructure, including 30 transmitter sites, microwave/satellite backhaul, and nationwide integrations.
- Directed marketing campaigns (e.g., "Captain Beep Beep" radio series) with $13k-$20k monthly budgets, driving rapid subscriber growth.
- Managed full operations: HR, accounting, IT, inventory, repairs, and FCC licensing/compliance.
- Recognized as U.S. Small Business Administration National Young Entrepreneur of the Year (1998).
